

Create Your Own IW

- Build from frozen so you are not unnecessarily thawing and refreezing bread and protein
- Wrap the sandwich build with parchment paper – it is microwave safe and allows for natural ventilation when heating
- Keep frozen until serving for at-home eating, or store refrigerated up to 2 days

Heat from frozen for 120-130 seconds or until hot in the middle for at-home eating

Heat from thawed 40-60 seconds depending on power of the microwave

Breakfast & Lunch IW Sandwich Ideas

From chicken and sausage biscuits to a ham and cream cheese croissant sandwich, make a delicious take-home breakfast sandwich

Lunch has never been easier or tastier with everyone's favorite burger and chicken sandwich or wrap up a Philly hoagie or saucy chicken parmesan sandwich for a great, heat-at-home meal
