

Flexible, innovative nutrition management solutions that adapt to your changing environment

NEW
FEATURES

TITAN Up with superior technology and support to succeed and be prepared for whatever the future brings.

We're proud to introduce special COVID-friendly innovations that you can't find anywhere else to help districts succeed in these challenging times AND be prepared for what's ahead. The TITAN team of school nutrition veterans is here for you!

Now, your district can benefit from TITAN's:

- Point of Service
- Application Processing (includes free online applications)
- Online Payments (meal payments, all other district fees)
- Inventory and Mobile inventory scanning
- Purchasing
- Financial Accounting (accounts receivable, accounts payable, general ledger)
- Menu Planning (includes free online menus updated in real-time)
- Curbside Pickup
- Nutrition Label Scanner
- Digital Menu Boards
- Production Records
- Mobile Temperature App
- Email, text, and voice notifications
- Vending
- Custom Reporting
- Online Preordering
- Free District, Parent, and Student apps for android and iOS devices
- Hardware (if needed for traditional or touchless serving)

Saves Time

Automated Reporting

TITAN School Solutions is the nation's fastest growing school nutrition software and services provider. TITAN delivers a fully-integrated, 100% cloud-based solution to over 500 school districts across the country and helps to maximize value and streamline operations. Our experienced team of school nutrition experts is committed to listening to the needs of the industry and is continually bringing forth innovations that make the lives of school nutrition professionals easier — helping YOU to succeed.

Save Time

TITAN technology eliminates the need for redundant, manual data entry. Now, you can enter your data once and have it available in every module throughout the entire district.

Online Payments

Manage meal payments and all other district fees at no additional cost through TITAN's Online Store.

Fully-Integrated

All TITAN modules work together seamlessly under one centralized database.

100% Cloud & Browser-Based

Access the entire platform from any browser with no software to install, even at the POS. Continue serving meals even if the network goes down.

Online Preordering

Access online preordering and the new Student Connect App to enable contactless serving with real-time data and scanner-ready digital identification.

Real-Time Data

Process an application the moment it is completed, run reports on your serving lines in the middle of lunch, and spend money at the POS seconds after a parent completes the transaction.

Hardware

TITAN believes in lower-cost hardware and only sells/supports unlocked devices and the most cutting-edge hardware. Bring your own devices, buy your own, or purchase some from us. All are welcome on TITAN.

Compliance Assurance

Always know that you are in compliance with USDA regulations with the simplicity of TITAN's Administrative Review Reporting Process.

Curbside Serving

Manage and enjoy the functionality you need for serving curbside or at remote locations - up to 7 days of meals in one session - with no need for date switching.

Contact Michele Rogers to schedule a no-obligation online demo to see if TITAN is the right fit for your organization.
