the **bytes** behind every **bite**.

QuikLunch is a fast and simple point-of-sale solution for cafeterias that allows you to streamline lunch payments, and easily track and report on free and reduced meal payments with full USDA compliance.

By enabling you to quickly accept lunch payments within an integrated platform, you can serve more students, giving them more time to enjoy the nutritious meals you have prepared.

QuikLunch

KEY CAPABILITIES:

Simplified Meal Processing and Reporting

All state and federal reports are contained in the system, as well as daily sales reports and individual transaction breakdowns.

Easily process, track, and report free and reduced meal payments for simpler and more accurate reimbursement, while encoding your student's meal status to maintain confidentiality.

Centralized database within PaySchools Admin with extensive state and federally compliant reporting that is accessible from any school or building in your district, or only within a single school.

Allows automatic updates of student balance availability and records with your own student information system for fast, easy, and compliant reporting.

Intuitive menu and student-profile interface that can be operated by pointing and clicking or by touch.

The "meal" button allows cashiers to process a complete meal with one click, speeding up lunch lines and serving more students.

Easily create rosters and custom student lists across your entire district or a single school, and search for students based on roster, grade, or classroom.

Add sales tax based on patron type, and run sales tax reports on all purchases.

Permission-based drawer system and auto-close drawers ensure cash drawers are accurate and closed daily, but can be re-opened and edited for any date in the past with correct permissions.

Flexible, Integrated Platform

POS runs offline in the event of internet connectivity loss.

Meal payments are automatically updated for you when connectivity is restored, meaning data is never lost.

Compatible with PIN pads, biometrics, and card readers, giving multiple options for identification.

Integrates with other district software, PayForIt.net, and QuikApps.

Integrates with scales for weight-based sales.

Specify which versions of the program run on each terminal, maintaining uniformity across large districts, or customize based on individual school needs.

Dynamic meal pricing controls the cost of second meal purchases based on patron type and free or reduced meal status.

Interfaces with vending machines to allow access to quick meals outside of standard mealtimes.

We can show you how to increase the efficiency of lunch payments and free and reduced meal reimbursement.

Call us at (855) 210-8232 opt. 4, or email our team at sales@payschools.com.

ADVANTAGES FOR YOUR DISTRICT:

Powerful and Customizable to Better Serve Students

Students can use their balances at any school in your district.

See a student's balance, free or reduced meal classification and special dietary or nutritional needs at a glance district-wide, with convenient pop-up alerts.

Restrictions on specific items and daily spend limits can be set by parents to determine what and how much students can purchase each day.

Run multiple lunch lines while keeping track of who you're serving and how many free and reduced meal payments you process.

Encourage parents to add more funds to student accounts by setting bonus dollar amounts.

Add funds from a designated donor account to students who need to borrow lunch funds, and keep them from running a deficit in their account (Special Accounts like Principal or PTO).

Stay on top of low and negative balances with automated low balance reminder letters for parents, warnings and charge limits that can be set by school and patron type.

Speed Up Your Lunch Line

Transform any Windows OS computer or tablet into a functional POS within minutes.

Cashiers can quickly and easily access a student's information at a glance.

Lunch lines go quickly thanks to fast transactions made easy with customizable button menus and screen layouts.

Free, reduced and staff meals can be easily identified, processed, and tracked.

Cashiers can print a receipt from the POS, speeding up refunds or voided transitions.

Easy to learn and implement, with POS training mode that allows staff to learn in a "live" environment.

Automatically switch between individual meal periods and layouts like breakfast, lunch, and snack based on time of day.
