

MORE THAN FREE MENU PLANNING

SFAs can benefit from **free** USDA-approved menu planning and nutrient analysis software along with online production records for every site they manage.

EZ REVIEW REPORT

Your Administrative Review will be a breeze: all documentation is automatically pulled from your menu and production data in the software, including CN labels, PFS, and standardized recipes.

BUSINESS INSIGHTS DASHBOARD

By completing your Production Records and entering pricing information, you will have all the data you need to make the right decisions and run an efficient program: participation, meal cost, MPLH and Production Record completion.

QUICKSTART

Changing software was never so simple! The software costs you nothing but for a small fee, our team of RDs and Menu Planners will build your cycle menus, create and credit recipes, and add local ingredients so you are ready to go. You provide the details and we will do the data entry.

ONLINE MENUS AND MOBILE APP

Take your menu to the next level once it is created with additional modules for publishing. Your menu automatically loads to any device allowing parents, students and nurses access to nutrient calculations, allergen and attribute-filtering capabilities, ingredient information, and translation. Beautifully designed to highlight everything your program offers.
